

Support our country's future leaders! **ADOPT A FUTURE LEADER**

Teach for the Philippines' pool of Teacher Fellows is composed of **the best of each year's graduating class and driven young professionals** who have committed two years as public school teachers. They have undergone a rigorous selection process to test their leadership ability, and are set to **develop students who are functionally and technologically literate, critical thinkers, and contributors to society.** Once these young leaders complete their two-year commitment, they become Alumni armed with on-ground classroom experiences and **prepared for leadership roles in Education, Government, or an organization contributing to Education Reform.**

Each Teacher Fellow teaches a class of at least 50 public school students. **By supporting a Teacher Fellow, you also support the development of these students.** You also help accelerate the movement towards education equity in the Philippines by aiding the training of our future leaders.
